WHERE TO PUT FERTILIZERS.

Are the Best Results from Broadcast Sowing or Drilling?

Fertilizing is an opinion expressed by prominent farmers and communications made to Breckinridge.

N. D. Platt, Connecticut, writes: "It has been my practice to broadcast all fertilizers except manure and the drill other half. To think of sowing to get the crop out and to give the crop an early start and push it ahead as vigorously as possible before the insects, etc., appear. I always apply my fertilizer by hand. I would rather fertilize the plant than the crop after plowing, as soon as the soil was in a condition to receive it. I do not think it would pay to either broadcast the fertilizer or to mix it with the manure." —

Woodcut Pettit says: "Should decidedly drill for wheat, the advantages being, so far as experience goes, as two to one in favor of the former. I have not had sufficient experience to give a well grounded opinion as to whether it would be well or not. My plan has been to use about one pound of high grade fertilizer to the acre, and this has given satisfactory results. My experience for corn is that 60 pounds of fertilizer applied in the hill will give plants a good start off, making after cultivation much more convenient and increasing the crop, but on poor land much more fertilizer will be needed, and it should be applied broadcast in addition to what has been drilled."

D. C. Lewis, New Haven, Connecticut, also writes: "I have practiced both on the same crop. I have broadcast entirely and have applied all in the row at the time of planting. In consequence of the bright striking of the potash in the fertilizer, the plants are easily to cultivate now. This has given satisfactory results."

Probably the greatest disappointment to a true fancier is the poor quality and small entries of white faced black Spanish. It is the best known and best in the poultry world and deserves better support. The beautiful race of Polish fowls is being neglected, however, so we see it entering the winter markets. The golden penciled Hamburgs probably the handsomest of all domestic fowls, are being carelessly handled and show signs of deterioration.

Lugubrii have held their own, especially the brown variety. The white Leghorns are equally fine in points, but it seems to me they are not as good as ever, while the buff Wyandottes promise to lead the entire family in popularity, being handsomely dressed and practical fowl. Plymouth rocks are still extant.

Silver and lookouts have improved greatly and lookouts, we are told, are as good as ever, while the buff Wyandottes promise to lead the entire family in popularity, being handsomely dressed and practical fowl. Plymouth rocks are still extant.

The white variety is well preserved. The new buff Plymouth Rock promise well.

Buff Cochins show wonderful improvement and are now the most popular of 24 birds at New York will long be remembered. Indian games need attention.

Breeds are drifting away from the original type and paying too much attention to color, instead of seeking true form or shape.

Of the French breeds the good and useful old Holland is again looked up. The Lege is still confined to few breeders. It is one of the best of table fowls, also a prolific layer of large white eggs. Crevecoeur are also easily seen, though they have a much stronger tendency to produce broodiness than the others.

Dorkings hardly hold their own, while Red Caps seem to have dropped almost entirely. Both are breeds of surpassing beauty, but are not so popular as the others.

The Java fowl with whom becomes extinct, unless more attention is paid to its good points. Games are again becoming popular.

This is due to the efforts of the Dairymen.

Preparing Potato Seed.

If the potato is allowed to grow in a warm, dark place, it quickly sprouts and becomes very tender from the tuber. The slender white shoot is good for nothing to begin a healthy growth, and it has taken so much of the substance of the root that it is useless for seed or for eating. Exposure to the sunlight and dry winds, however, makes the seed better, according to American Cultivator, authority for the potato. The sprouts are dried in a light cool room, but one that will not freeze. The slower the green shoot pushes and the more the potato dries out the stronger will be its subsequent growth.

If the seed is dried in a warm room, some potato gardeners who have learned this secret always get early potatoes in market before their neighbors.

This is due to the efforts of the Dairymen.

A weak solution of camphor and common soap is recommended by some for the hives. Honey commands a good price and will be likely to do so until a new crop. Don't worry about the number of bees you have, be anxious about getting enough honey to overstock it. Good honey will never spoil. The longer it is kept the better it gets. Whoever will become a Jay Gould in bee keeping, however, must be prepared for emergencies. This is the secret of success in all pursuits.

The Coming Hog.

A member of the Michigan Swine Breeders' association said at a meeting of that organization:

I believe the coming hog will be black—white—red, with spots if you just where we want them. They will be well behaved, and we will require extra fencing on his account. He will be ready for market at any age and will give 500 lbs. of dressed meat at \$100 per hundred. He will have all the qualities of the Duroc, China, the Chester White, the Victoria, the Essex, the Yorkshire, with the gentle disposition of the Durso Jersey and the Hayes' drug store.

leath meat of the Berkshires.

In most washes is furnished one of the most serviceable manurial substances for peat or muck soils.

POULTRY SHOWS.

Lessons Learned at These Exhibitions—Incubators—Different Breeds.

An increased and widespread interest in well bred poultry is attested by the frequency and importance of the poultry shows held east and west. While mostly poultry was gradingly allotted restricted space at the agricultural fairs and regarded as a second rate sideshow, the interest in the exhibition of fowls to date has been so great that the entire estimate was attended by \$11,000 worth of exhibits; the aggregate sales amounted to \$10,000, and the premiums to \$2,125 in general prizes and \$1,500 in special prizes. The interest in the exhibition of poultry is now so great that the entire space allotted to this purpose, boiling hot water in which is usually a strong concentration of lime, enough to eat the glass and stone, thus necessitating two washings each day.

As soon as the separating is over, I turn the pan upside down, so that the water is in a pool in a small tin of clear, warm (not hot) water. I have a stone, hempen cord about a yard long, pass it through the pool of water, and then through the string. Then I have ready in a dish pan, used for this purpose, boiling hot water in which is usually a strong concentration of lime, enough to eat the glass and stone, thus necessitating two washings each day.

In order to get the most money out of it is necessary to make many round trips, and the distance between the incubator and the wash is simple enough. There are three of these placed on 44 feet of floor space. There above the incubators are rooms, two rooms each and one suite of three rooms. The back rooms are all well lighted.

I then take my piece of broom handle, sawed just long enough to reach across the top of the pan to dry the string. I then dip the string into the water, and when it comes out, with a few turns around the cylinder. No drying with a cloth is necessary, as the heat from the boiling water poured over them dries them thoroughly. Wash and wipe the rubber ring and screw down the top of the bowl.

Putting the string across the top of the bowl, I turn the bowl upside down, so that the water is in a pool in a small tin of clear, boiling water over the glass, remove from the top of the pan and let them drain and dry, and while they are drying wash and dry, and then put my separator in complete order in 15 minutes, and, too, without any trouble whatever. By this time it obviates the necessity of handling each disk or plate separately and prevents the risk of getting the plates mixed. The plates should go into the bowl consecutively according to the numbering, this plan of stringing precludes the misplacing of the numbers.—Mrs. Kate M. Busch in Hoard's Dairyman.

Probably the greatest disappointment to a true fancier is the poor quality and small entries of white faced black Spanish. It is the best known and best in the poultry world and deserves better support. The beautiful race of Polish fowls is being neglected, however, so we see it entering the winter markets. The golden penciled Hamburgs probably the handsomest of all domestic fowls, are being carelessly handled and show signs of deterioration.

Lugubrii have held their own, especially the brown variety. The white Leghorns are equally fine in points, but it seems to me they are not as good as ever, while the buff Wyandottes promise to lead the entire family in popularity, being handsomely dressed and practical fowl. Plymouth rocks are still extant.

The white variety is well preserved. The new buff Plymouth Rock promise well.

Buff Cochins show wonderful improvement and are now the most popular of 24 birds at New York will long be remembered. Indian games need attention.

Breeds are drifting away from the original type and paying too much attention to color, instead of seeking true form or shape.

While such common errors as mentioned above are to be deplored, it is nevertheless true that one is improving the general condition where he puts something fairy good where there is no such thing. Heavy feeding, which is one of the most essential to success, breaking the string and dipping with no small degree of skill or else it will result in a diminished instead of an increased power of production, and it is evident that the safety of the animal itself leads to the loss of the animal itself.

If absolute safety is to be considered, it will be necessary to remember that the safety of the animal is absolutely dangerous and the feeding of animals is contrary to the general rule. But it is possible to learn very much about the merits of a cow as a business without incurring any special risk.

If the feed is increased gradually, as it invariably ought to be, and its effect is to be fully noticed, the owner of a cow will naturally increase his feeding when the safe limit has been approached. Long before that point is reached he will be able to determine whether the increased quantity of food supplied a profitable return for the labor and expense involved.

Both the safety of the animal and the feeding of animals is contrary to the general rule.

# MERIT WINS

That is why German Prune Syrup has taken the lead over all other Laxatives.

# GERMAN PRUNE SYRUP !

Is a concentrated Fruit Compound, and is the most pleasant and effective remedy known, to act gently, yet promptly on the Bowels, Liver and Kidneys, it cleanses the system, it effectually cures Constipation, Headache and Fevers. After the long, hard winter, a torpid liver is the natural result, and indigestion and constipation follow. The best Spring Medicine is German Prune Syrup, which is pleasant to take, mild in its action, yet prompt in its results. German Prune Syrup can be taken by ladies in delicate health with the utmost safety. Give German Prune Syrup to the children it is pleasing to their taste, and its mild results have made it THE MEDICINE for the little folks.

German Prune Syrup is a remedy that has long been used in Germany, and all Germans are familiar with the merit of the German Prune.

Manufactured Only by

THE GERMAN PRUNE SYRUP CO.,

HAMBURG, GERMANY.

CHICAGO, ILLS., U. S. A.

**Take No Substitute. For Sale by all Druggists.**

BRECKENRIDGE NEWS.

WEDNESDAY, MAY 3, 1893.

THE CATHOLIC CHURCH.

Rev. Mr. Hamilton, a Presbyterian Minister, Paints a True Picture of It.

The Oakland (Cal.) News reports the following portion of a sermon delivered in the Independent Presbyterian Church, of that place, by Rev. Mr. Hamilton: "We are compelled to admit that this other Mother Church shows an astounding vitality, and we are compelled to admit that she still lives at her altar. The common people still cling to her robes. Through pitiless storms that leave the seats of our protestant sanctuaries nearly vacant, we see them crowding to her worship, morning, noon and night. Wherever a few of her children make their homes a cross sums up the entire result. She is a true builder wisely to meet convenience among the poorest communities, to win aesthetic culture wherever wealth creates such a taste to be pleased, and her people pay for her churches."

"Her missionaries are always crowding to every heathen country and among the great populations of India and China. They still import by scores for every one that Protestants can count as the fruits of their labors. No degree of possible self-sacrifice demanded by their work turns them back. No danger appalls them. Wherever she gains a foothold she speedily erects the umbrella of her mind is made up. It is not doubtful; she has the stability and force of the single mind. Her ritual is one for all the world—for the pure at Rome and for the Digger Indian" in California.

"Wherein lies the secret of this great strength? One short sentence gives the answer. That church has learned to do the same thing that the church of Christ did for moment. There is no debate over methods. The preliminary work of all are settled. All hereticism is cut off. There is nothing to be done but the work. And what that is

weakness of human life there you will see her sisters of Mercy and Fatima Conventors never shrinking from the touch of the plague never leaving the field or remitting their ministries of care till the scourge departs or death discharges them. And many a good priest has evinced his sincerity as well as his courage by going into the battle field where death is fiercest and thickest that he might give the comfort and hopes of his religion to the dying.

"We sometimes hear it said that the whole system of Romanism is a shell without a heart, substance or spiritual life, that the masses are duped by its false pretenses, but its readers know it is a shell with a heart, a soul, a spirit, vital with the evils in any power which millions of human hearts love and trust and find comfort in until we learn to do it justice. We know that men do not endure half a century of voluntary pain and sacrifice for what is in their eyes a phantom sham."

"More than forty years ago, after a long and weary pilgrimage, the author of this article, who had been born in a small town in New Jersey, had come to the conclusion that the Protestant church was not the true church of God, and that it was not fit for him to remain in it longer.

"The judgment of charity is beginning to supersede the judgment of infidelity upon her. The tone of Protestantism respecting her value is rapidly changing.

"The Atlantic Monthly not long ago sent forth an appreciative article that fully conceded her merits.

The Rev. Thomas K. Beecher followed with an article in the Atlantic Monthly.

Mr. George Moore, of Leitchfield, attended the burial of Mr. Moore Tuesday.

Mr. George Hunter visited their sister, Mrs. Joe Parsons, this week.

Mr. Neil Cannon and Master Ernest McDonald attended the burial of Mr. George Moore.

We hear that Mr. Nick Mercer has the Texas fever. His condition hope it will not take effect soon.

Mr. Stanton Garner and Miss Mattie Glasecock, of Antioch, attended services here the fourth Sunday.

Mr. George Hall, of West View, spent last Sunday here.

Mr. Gannaway and Miss Morris, of Antioch, were here last Sunday.

A little boy Cannon was here. There is a little boy Cannon was here.

Mr. George Moore, of Leitchfield, attended the burial of Mr. Moore Tuesday.

Mr. George Hunter visited their sister, Mrs. Joe Parsons, this week.

Mr. Neil Cannon and Master Ernest McDonald attended the burial of Mr. George Moore.

We hear that Mr. Nick Mercer has the Texas fever. His condition hope it will not take effect soon.

Mr. Stanton Garner and Miss Mattie Glasecock, of Antioch, attended services here the fourth Sunday.

Mr. George Hall, of West View, was here last Sunday, looking after some slaves.

That bachelor of whom we spoke has changed his address, but still he has obtained a new suit and is ready for business.

Mr. Sam Heninger and children, who were visiting here for the past week, have returned to their home in West View.

Rev. Cundiff and family and Rev. McElrath and family dined with Mr. Coke and family last Saturday and are still praising the excellent dinner prepared by Mrs. Coke.

Young Mr. Willis, of Leitchfield, who is well known here, while handling a pistol, accidentally shot himself. While his wound is quite painful it is not considered dangerous.

Mr. George Hunter gave a dining las Monday. Those present were Rev. and

was decided ages ago—to extend and preserve the church as she is. Each member soon learns his part. Age after age the command goes forth from the triple crowned Head at Rome. The whole mighty organism, from the scarlet Cardinal to the rag picker in the street, moves responsive to that command.

Bad complexion indicates an unhealthy state of the system. DeWitt's Little Easy Risers are pills that will correct this condition. They act on the liver, they act on the stomach, they act on the bowels. Short & Haynes, Cloverport, and Beard & Beeler, Hardinsburg,

MCDANIELS.

Rev. E. N. Metcalfe was in Leitchfield this week.

Mrs. Dora McDonald spent several days last week with her uncle, George Moore.

Mr. Mat Jarrold, of Glendale, was here last Sunday.

A small boy, son of John Allen, the short line section boss, accidentally got one of his fingers cut off down at Bohler's blacksmith shop.

If you want wall paper cheaper than it ever known to sell at before go to T. F. Sawyer's. He will also hang the paper as cheap as any other paper hanger.

We have just received a nice line of fine candies from the Blanke Bros., Candy Co., of St. Louis. They are to be sold at a reduced rate for sixty cents a pound.

—Bohler.

The Earnest Workers, of this city, will run their second annual excursion from Henderson to Louisville, May 10th. Fare from Cloverport for the round trip will be \$1.50.

The great attraction now is the "Flyng Dutchman." It is about a \$2,500 plant, the largest of the kind ever put in the city and it is reaping a harvest of about \$25 an hour.

All persons wishing to send their laundry off must bring it in Monday so that I can get it back by Saturday. Please write your name on your package.

ERNEST BARBAGE.

Mr. J. R. Cottrell will deliver his lecture, "Blame Shyne," at the First Methodist church to-night. Every body is invited to attend. This is the Dotor's favorite lecture and wherever it has been delivered it has met with the highest approbation by hand and appreciative audiences. Dr. Cottrell is a great man and those who do not hear this lecture will miss an intellectual treat.

Real coffee at Sulzer's.  
Cigars and tobacco at Morton's.  
Yours for comfort—Sulzer's shoes.  
Goods sold while you wait at Sulzer's.  
The Baptist church at Patteeville has a new bell.

Mrs. James Miller is visiting in New Albany, Ind.

Leave your orders for ice cream at the city Friday.

John P. Noonan, the oldest drummer in the band, was in the City Friday exhibiting his samples.

The base ball season has now opened, and who is it that Cloverport has no club? Let's see, it's up.

Mr. H. C. Brandenburg, died at home in this city Friday morning. She was taken to Garrettsville for burial.

This store is progressive and aggressive. If we have the best stock of paints and oils in Cloverport why shouldn't we tell you about it?—Short & Haynes.

Judge N. C. McMerer, Jailer John Slaton and Taylor Beard and son, Tom, John, and all of Hardinsburg, were in the city Friday.

Think of the prettiest girl you ever saw, how would she look with an ugly hat on her head? I keep pretty ones and sell them here.—Mrs. E. Haynes.

C. H. Riedel & Co., have a new floor in their store room, and put in a nice new front. The appearance of the building is much improved.

A watch or a clock that keeps good time is what you want. There are any other piece of jewelry may be bought cheap at Short & Haynes'.

Gilmour & Hicks, proprietors of the Riding Gallery request us to state that Tuesday and Friday nights will be set aside for the colored people and the other evenings for the white people exclusively. They have this arrangement by request of leading citizens of both races.

Don't forget that the Riding Gallery will run every evening and night this week. Monday, Wednesday, Thursday and Saturday for the white people and Tuesday and Friday nights for the colored people. Only 5 cents to ride, nothing to look on.

Remember that on the nights set apart for the white people no tickets will be sold to colored people, and on the other evenings set apart for the colored people no tickets will be sold to the white people. Good order will be enforced at all times.

Gilmour & Hicks.

Mr. F. P. Haggard, bridge superintendent for the Texas, has presented Clarence Keith, the marble cutter, with a fine mallet. It is made of a hickory wood and Mr. Haggard ordered in the streets of Goshen, Ind. It is very nice and Clarence says that he will use it only when he works on Sunday or when he goes on dress parade.

The Cloverport City election Monday resulted as follows: Councilmen in the First Ward—Henry Solberg, R. B. Pierce; Second Ward—F. S. Miller, W. G. Smart and F. J. Ferry. But one member of the old council, R. E. Pierce, was reelected. These are all live, progressive men and it is thought that the good work begun in the last year will be completed, besides we will probably have another year of good government.

Cloverport's newest member, big boy last Friday by a mere scratch. Just while the guests of the Cloverport Hotel were seated at dinner the kitchen roof was discovered to be in flames, and the alarm of fire was immediately sounded. The citizens responded promptly and by the hardest work the building was saved. The kitchen roof was entirely destroyed incurring a loss of about \$50. The hotel burned it would have been impossible to save several other buildings.

The new schoolhouse that has been built in Glendale, a fine structure, occurred late Saturday evening. Lige Gibson turned the post-office corner with a large wagon load of furniture and started toward the bridge. From some cause he became frightened and soon became uncontrollable. They dashed down the hill and across the bridge at a rapid rate. At the West end of the bridge they struck a rock and the wagon loaded with flour and hardware dashed into it, knocking the house down, smashing the wagon and scattering flour all over the street. As the furniture wagon went over Fraize's house it was upset and the whole load of furniture was dashed against the front door of Long's drug shop. Two running machinists, one being a black boy, broke through the glass and pieces. In fact the only thing not hurt was the plate glass mirror to the dresser, which was found safe and sound at the bottom of the wreck with a 150 pounds trunk on top of it. The drivers of both teams, when they saw that the wagon was inevitable, jumped and saved their lives.

We have just received a nice line of fine candies from the Blanke Bros., Candy Co., of St. Louis. They are to be sold at a reduced rate for sixty cents a pound.

Mr. and Mrs. C. H. Brandenburg, died Saturday evening to spend Sunday at the home of his son, Mr. and Mrs. James G. Stephen, of Holt.

Z. Cox is doing a successful business from their trip out and spent Saturday evening with Mrs. Norton's parents, Mr. and Mrs. James G. Stephen, of Holt.

John Hoben, a Hardinsburg man, has stepped into a nice business at Ekron. The style of the firm is K. & Hoben. They carry a line of men's clothing and are doing a nice business. John Hoben has made a fine impression on the good people of the place judging from the many complimentary remarks made about him. The News is glad to add its testimonial to his many good qualities.

Blant Shacklette, one of the large fruit growers of Meade, says he will have plenty of early apples but very few late ones. He thinks the season to be a failure all over the section.

Mr. Willett has placed the News under obligations to him for a pleasant drive from Ekron to Guston. The Doctor is one of the moving spirits of that thriving town and his particular hobby now is the new college building. He thinks the enterprise will be a success.

Charles Clark, of Brandenburg, has located at Guston and opened up a general stock of merchandise in the store house formerly occupied by Mr. Grand. Mr. Bryant is not a stranger to Guston people and the News predicts for them a good trade from the start.

Rev. D. W. Herring, a missionary from Cincinnati, will deliver a lecture in the Habersham church on Saturday evening at 10 o'clock a.m. Everybody invited.

The Baptist Missionary meeting held at Irvington last Sunday was one of the most enjoyable events it has been our pleasure of attending in a long while.

Despite the rain and storm there was a large attendance of visitors from every section of Meade and surrounding counties. There is no more social gathering in the country than the annual meeting of the Baptists.

Mr. Milner has however, been pursuing his medical course in this city. Yesterday Mr. R. C. Riddle, of Louisville, came here to attend the State fair. The young couple arrived in Cloverport last Friday evening and are now guests of Mrs. Watkins and Mrs. Roth. E. Moorman, brother and sister of the groom. They are wealthy, and move in the highest society of Breckinridge county.

The colored church at Irvington suffered a heavy loss in the blowing down of their house of worship. It was a new building only partly completed and the loss is a serious one to them.

Thomas Bohler, while helping to lift a large stone in front of D'Hyu's store yesterday afternoon, severely strained his back. He fainted at the time and was not able to walk yet at a late hour in the evening.

Two negroes had a fight on Easy street yesterday afternoon in which the two fell pretty lively for awhile.

They were arrested and one was fined \$100.

They were released on condition that they would not witness in ten years of the truth as to his age.—Columbus Missouri.

The river is nearing the top of the banks and will stay so fast, so far up, that there is a strong current.

Clover creek. Several large trees and other debris have fallen across the bridge and into the river.

It is thought that the bridge will be washed away.

One old experienced marauder, of the ridge-rooster type, defies the law and will not be captured. His haunts are around the bridge and he is said to get into kinds of palatable freight. Yesterday all the kids in town tried to chase him and was unable to get him the slip and is still at large.

The hog went into effect Monday.

The river is nearing the top of the banks and will stay so fast, so far up, that there is a strong current.

One old experienced marauder, of the ridge-rooster type, defies the law and will not be captured. His haunts are around the bridge and he is said to get into kinds of palatable freight. Yesterday all the kids in town tried to chase him and was unable to get him the slip and is still at large.

G. Roth, a freshman on the "Texas" road has invented a gasoline engine that is said to surpass any that has yet been in use. He has been to Washington and has associated with him a gentle man of means at Terre Haute, Ind.

Large machine shops are now being erected in that city, for the sole purpose of manufacturing these engines, and they will be ready for operation in a couple of months. The first engines made will be used for running threshing machines, etc. The first gasoline engine will only weigh about 150 pounds and are destined to supply the place of the heavy steam engines now in use. Mr. Roth was here last week receiving the congratulations of his many Cloverport friends. His invention will no doubt yield a large fortune.

To All Whom It May Concern.

CLOVERPORT, KY., April 29th, 1893.—

This is to certify that I have been afflicted with a severe attack of rheumatism, and unfortunately heard of J. R. Mitchell, of Mooneyville, Breckinridge county, Kentucky, as being a successful handiwork of that dread disease. I placed myself under his treatment, and he has effectively cured me. I would say to all persons affected with cancer to apply to him at once. For the benefit of the validity of this statement, I will say that my cure is preserved in alcohol and is now on exhibition at A. R. Fisher's drug store, in this city.

Mr. Mitchell is a prominent merchant and is well known to be a reliable gentleman.

We know it was hard to give her up,

One so good and true, but we must do what we must.

For all her friends and you,

God bless this mornin' husband,

Whose heart is boundless and sore,

May she always be true to you,

But we need her dear to us not more.

# COMING WARM

weather is now close at hand and many men and boys will have to change from their winter suit to one more seasonable. All such can not do better than come to us direct. If we can not please them in "our own make" they can't be suited at all. The goods are what you want and so are the prices.

## CONFIRMATION SUITS IN GREAT VARIETY.

Julius Winter & Co.,  
"OLD RELIABLE" CLOTHIERS,  
COR. THIRD and MARKET STS., - - - LOUISVILLE, KY.

### Lusk-Keith.

The Pretty Wedding of Miss Jennie Keith to W. A. Lusk.

Another One of Cloverport's Best Girls Gone.

Ed. Gregory will start out with Sulzer's fine show about him. He likes many things among them, among them, illustrations of Cloversport and her industries. The people of Breckinridge and Meade counties, who are familiar with Cloverport, will be pleased to see him.

Bob Allen, of Hawesville, came up Sunday and spent the day shaking hands and joking with old friends.

Mr. and Mrs. C. H. Brandenburg, and their son, Mr. C. H. Brandenburg, have moved to Owensboro, where they are engaged in the shoe business.

John Hoben, a Hardinsburg man, has stepped into a nice business at Ekron. The style of the firm is K. & Hoben. They carry a line of men's clothing and are doing a nice business.

John Hoben has made a fine impression on the good people of the place judging from the many complimentary remarks made about him. The News is glad to add its testimonial to his many good qualities.

## BRECKENRIDGE NEWS.

WEDNESDAY, MAY 3, 1893.

## SHEPHERDSPORT.

Mr. R. A. Smith is on the sick list at this writing.

Mr. R. A. Shellenbach went to Cloverport Monday.

Mr. Roland Watlington went to Cloverport Friday.

Mr. Cy Pace, of Hardinsburg, was in town Saturday.

Mr. W. L. Board, of Hardinsburg, was in town Sunday.

Miss Lizzie Price spent Saturday and Sunday at her home in Chautauk.

Have you heard about the rainy weather, we have had, and are still having?

Misses Georgia Hawking, Emma English and Mr. Sam Dix went to Louisville Sunday.

Ask Roland Watlington or he will make it his webbing.

Jeff Hook, of Hardinsburg, was in town Sunday. He said he would have gone to Louisville if he had not met

Stephensport and the surrounding country is becoming quite romantic. On last Wednesday afternoon, Miss Annie Stiff and Mr. Junius Walls, of near here, came to town and took the 9:30 train for Cannelton, Ind., and were there the following morning united in the holy bonds of matrimony. Her bridegroom left here and took the same train. On their return they stopped at the Dowell house for a day, then left for their home.

Sunday, April, 30th, 1893 at 3:40 P. M., Mr. Add Bennett, son of Mr. and Mrs. J. H. Bennett, of Louisville, departed this life. He was buried the following Tuesday morning at the cemetery of the Baptist church. He was born January 1884, now being in his 30th year. "Was sad he was taken just in the prime of life, or it seems when life was just beginning for him, but our heavenly Father, the Ruler of all things knows best."

Besides parents, he leaves a wife, brother and sister, and a son, who is still mourn his loss.

To them we offer our sympathy in this, their sad bereavement, but they should look, and pray to a higher power for consolation.

No more or less for him.

Take a walk with us.

Dear parents, your brother, wife,

Will be called up too.

For Add's at rest, he knows no care,

He sleeps in sweet content,

His spirit now looks bright

With the angel, who was sent.

## CLINTON MILLS.

Quite a number of the fair sex were in town Thursday getting new hats.

Businesses of this vicinity have not planted any corn and some are not done breaking.

Our Sunday school with B. A. Parks as Superintendent is flourishing and growing brighter every Sunday.

Miss Luis Skillman, of Webster, is teaching a subscription school here. We wish her success in all her undertakings.

Wanted and wanted bad, some man with capital to come here and put up a good stock of goods and tobacco.

There are two thousand barrels of

large and small, from old cigarette mill to Webster ford. Look here boys we are "liven" for you. The grand jury meets the 8th of May and we assure you this will be investigated.

## Did You Know?

That Mosely ground 500 bushels of wheat last week and "pulled" every man for all the tobacco he had regardless of distance from home?

If you want to trade watches here is the place, but don't put the cheap watch in the case good.

That it is time to trade "hoss" hiders just blate it out and some of the boys will accommodate you.

That Dyer Mosely buys eggs for nine cents with the chickens "thrown in."

"There is a salve for every wound,"

We refer to DeWitt's Witch Hazel Salve,

cures burns, scalds, cuts, indolent sores

and all sorts of the most trifling

cures catarrh and always cures piles,

Short & Hayes, Cloperton, and Beard & Beeler, Hardinsburg, Ky.

## LUDOBURG.

Quite an excitement was created near this place this morning by a little five-year old child of Mr. and Mrs. Tom Robinson wandering away from home and getting lost. The little girl's mother had been looking for her, and instead of returning with the mother, she went with the wood, she just went on. Her mother soon became uneasy and went to see after her, but could not find her and after satisfying herself that the child was gone she ran to the field to tell her husband. They both being very much alarmed, got up to look for her help and after a diligent search for about two hours the father came back with the child. He had overtaken it about two miles from the home on the Clifton Mill road near Mr. Nap Robinson's house.

Mr. Frank Basham died in his home near Union Star, April 22nd, with dropsy.

Quite a number of friends and relatives gathered at the funeral home yesterday Sunday evening to pay their due respects.

Bro. E. P. Gardner his remains were laid to rest. Mr. Basham was quite old. He would have been eighty-six in June. The entire family, and especially the feelings of aged mother, has our sincere sympathy.

## STATE NEWS.

Items of Interest from All over the Entire Land of the Colonies

Put Up in Capsules for the Easy Swallowing of Our Readers.

The races are going on at Lexington. Stanford is erecting a fountain in the public square.

The Daviess County Sun-day school Union met at Maysville church.

The State Encampment of the G. A. R. held their annual meeting at Owensboro.

The Baptist church at Hustonville is expelling members for believing in open communication.

The new hall park at Louisville is completed. It is a much nicer and larger park than the old one.

The Senate passed the Louisville charter over the Governor's veto.

The Representatives will vote today.

Good people are piled, but DeWitt's Witch Hazel Salve will cure them. Short & Hayes, Cloperton, and Beard & Beeler, Hardinsburg, Ky.

Louisville voted to give \$1,000,000 towards erecting State buildings, provided the Capitol would be moved to that city.

Geo. W. Bice has his left hand cut off by a paper cutting machine in the Courier-Journal Job Printing Company's rooms.

The Kentucky State Union of the Young People's Society of Christian Endeavor held its annual convention at Louisville.

Do you lack faith and love? Let us establish your faith and restore your health with DeWitt's Saraparilla. Short & Hayes, Cloperton, and Beard & Beeler, Hardinsburg, Ky.

Ion, W. P. Chambers died at his home in Park aged thirty-four years. He was a prominent citizen, well-known all over the States.

Newport is excited because it has been discovered that a roulette wheel has been shipped from a Louisville firm to a New port gambler.

Mr. Sill Miller, City Clerk of Louisville, was accused of assessing all the gambling houses \$50 per month each to insure them against prosecutions.

We sell Parks' Cough Syrup on a positive guarantee to cure all throat and lung troubles.

It has stood the test for many years and to-day is the leading remedy for all forms of colds, consumption and all diseases of the throat and lungs. Price 50 cents and \$1.00.

A frame house at Nicholaville was struck by lightning and completely destroyed. A woman and child were asleep in the building but were not hurt.

Benedict Sloope, aged seventy-two, committed suicide near Danville. He used two razors and a knife, and cut and cut himself to death.

Tom Morris, a citizen of Baskett, was arrested for breaking into a car in Laurel county ten years ago. He says he broke into the car but was drunk at the time.

The banks of Owensboro sent fifty-five thousand dollars in gold to the United States Treasury to help bridge the Government will call for it again when it is needed.

Julia Burke, the little girl who was so cruelly treated by Dr. and Mrs. Stivers, obtained a judgment of \$7,500 damages in the Louisville Circuit Court. She sued for \$70,000.

A little ill, then a little well. The ill is gone the will has won, DeWitt's Little Easier Risers the pills that cure great ill.

Short & Hayes, Cloperton, and Beard & Beeler, Hardinsburg, Ky.

A committee of citizens has been appointed to examine the books of Lexington, to see if fraud has been practiced in the management of city affairs, as has been accused by the Lexington Daily Press.

Mrs. A. G. Prewitt, whose husband fell down the elevator shaft on the opening day of the Grower's Tobacco Warehouse, in Lexington, 1891, was awarded \$6,000 damages against the company.

Two negroes who committed two other negroes at Stanford. One has

said that he is so bad that the lying editor has been fired.

In view of the big picnic for this town July 4. It will be run by Bushy & Co.

Mr. J. T. Litsey, agent for the Athene Life Insurance Company, was here last week.

Melia Parker, colored, wife of Giles Parker, died at her home here last week.

If you see it in this column you may know that it is so. The lying editor has been fired.

Keep an eye on the progress of the new school building. There is money in it to town.

Witt & Meador want all the wool you

can buy to market.

John Slaton got the contract for building a house for the paupers on the Poorhouse farm.

If you want the best and most durable spinning machine call on Bushy & Co.

We have something to attract the ladies, either in a pretty show or nice dress goods.

Miss Katie Ekkridge is visiting at Owensboro, and is a member of the Sam Jones choir.

We can fit you in size, price and quality of goods, if you want a suit or extra pants.

Beeler & Beard.

Mr. Long, the Cloperton butcher, was in his locality last week hunting beetle caterpillars.

## BRECKENRIDGE NEWS.

WEDNESDAY, MAY 3, 1893.

## LOTS OF LANDLORDS.

## NO LACK OF WORLD'S FAIR HOTELS.

Ample Accommodations For All Comers.  
An Estimate of the Cost of Living  
In Chicago — Pointers For  
Prospective Visitors.

It looks now as if the landlords would need the sympathy rather than their guests during the World's Fair. One of the Chicago papers has been gathering statistics and announces that 288 new buildings will have been erected in the vicinity of Midway park which contains 945 rooms. This of course is exclusive of the old hotels and boarding houses and of the "furnished rooms" which are available for transient use during the month of May. There are now over 50,000 rooms available for strangers near the grounds. There will be no place for private sleepers on the ground, or even on hotel roofs, so far as there is room enough to procure lodgings, and the indications are that the amount required to secure such accommodation will not be exorbitant. Competition will force a reasonable scale.

Tributed by their capacity to accommodate guests the World's Fair landlords make up this list:

	No. of hotels.
Between 25 and 50.	64
Between 50 and 100.	74
Between 100 and 150.	16
Between 150 and 300.	16
Between 300 and 500.	16
Between 500 and 1,000.	16
Between 1,000 and 2,000.	11
Between 2,000 and 3,000.	11
Between 3,000 and 4,000.	11
Between 4,000 and 5,000.	11
Between 5,000 and 7,000.	11
Grand total.	288

Omitting the cheaper and smaller structures of less than 25-room capacity, the hotels can be classed by material used in construction as follows:

	No. of hotels.
Brock.	100
Wood.	50
Stone and brick.	12
Wood and iron.	12
Wood and stone.	12
Staff.	1

Estimates as to the cost of the hotels in the world's fair district range from \$3,000,000 to \$4,000,000. Well versed builders who have been over the ground state that the higher figures are not too high. It would be interesting to know the amount of money received by the hotel companies in advance payment for accommodations which could be computed. Only here and there will one find a give away the figure. Who ever has had much to do with the enterprises on the outside give the total at about \$1,500,000. From the 500 or more buildings alone one could take in \$150,000. Substantial improvements are pointed out as having been made with the money received from agents, who have sold accommodations from one end of the country to the other.

In architecture there is almost limitless range. The temporary structures are of wood or of staff. Permanent buildings are to be continued in use as large family hotels or apartment houses stone has entered largely into the construction of the hotels. The Great Eastern, which contains 1,100 rooms and will cover a space 300 by 600 feet.

While it is undeniably true that a number of the more unscrupulous of the newly made bonafides of Chicago may overcharge or swindle unwary visitors to Chicago, with plain facts and no ordinary discretion will be subjected to extortion. Those who use no forethought must not complain if they meet with a bad time.

The best hotels will not advance rates, and in fact there is every evidence that Chicago intends to display herself honorably in this regard. The Park Hotel some time ago set an excellent example by posting a notice that prices were to be advanced in prices on account of the War. For a short time the rates during that period; also that contracts for rooms would be entered into at once. Some of the higher class of permanent houses served notice on their tenants to renew their leases at rates 1 for all leases running less than one year. There may be some hotels whose proprietors will not sight and greatly exceed to increase their profits, but the general disposition is to adopt the same plan as that of the Palmer House and charge only regular rates.

The World's Fair landlords, however, the expedition can make arrangements for rooms at prices to suit themselves. They can spend 50 cents for a bed and a hamper of groceries for the night. For \$1 a comfortable bed in a clean and airy room can be secured for two persons. Rooms can be secured without difficulty for a few hours after dark in the city for extortive prices, and hundreds of houses will be found on nearly every residence street where rooms can be secured.

Concerning the cost of meals, would be visitors should first consult their appetites. A breakfast of bacon and fried sausage will cost 15 cents in the down town restaurants. A supper with "Cardinal" beans at the Richeleien,ough

"YES"  
Of all fair women, you're the best,  
The fairest, the fairest, the fairest.  
Is she who never falls to say  
In tones inquiring, "Yes?"  
None, I assure you, so well a man can teach  
His right thoughts express  
And seal his lips and seal from speech  
As does the "Yes" of "Yes."  
Her charming grace I prize and praise,  
Her worth, her loveliness,  
And quite approve of all her ways  
Except her "Yes" to "Yes."  
Life must, I know, perplexing be  
As baffling game of chess,  
But still the "Yes" of "Yes" the "Yes"  
Will not say "Yes!"  
I oft resolve my woe to tell,  
My grievous dire contents,  
But still the "Yes" of "Yes" the "Yes"  
She'll gently murmur "Yes!"  
—Pittsburg Bulletin

## THE WRONG MAN.

POOR ROADS CAUSE DISCONTENT.  
They Have Done Much to Destroy the Glory  
of the Fair.

Good roads are of paramount importance to every citizen, but to the farmer especially. For the past few decades the farmer has given his attention to the problem of producing one of the best quality in the greatest abundance at the least cost, and in the solution of this problem he has succeeded admirably. But the longer he has tried to produce the cheaper his product, the poorer, apparently, does he find himself to be at the end of the year. One can seem to gain the profit, while the other loses.

One cause of this state of affairs is not difficult to find. The average farmer has not yet comprehended the value of good roads. He is ignorant of the expense of maintaining them. The expense of turning his produce to market and of returning those commodities for which he has failed to obtain a fair price to the culturist. The cost of carriage of crops one way from the farm to the railroad station, 5 to 10 miles distant, and of the feed, bedding, and other commercial feed stuffs, furniture, clothing, and provisions from the market to the country home has been so great as to reduce the value of his produce by 10 to 15 per cent, from the centers, 50 to 100 miles distant, causing them in many cases to be abandoned.

For example, a farm of 25 acres of arable land in the price of 25 acres of good land, and a poor road costs in getting a pair, a barn, plenty of fruit trees, located in the midst of magnificent scenery, on a farm of 25 acres, from Amherst College, Massachusetts, will cost the owner of two stations on two railroads, hardly a mile from church and schoolhouse, and stables, has been 10 years past with little purchase, and has only been vacant, while many have paid \$100 or \$100 more for a tenement of five rooms in a second story of a village house that was built for the rent of the whole farm, garden, orchard, pasture and tilled.

Poor roads are an efficient factor in retarding the progress of our rural population. During the winter months, muddy and dulled in spring and autumn, rough or slippery or drifted with snow, the worst poor roads are dangerous to travel on, and are a curse to men, women and children, to horses and carriages. They isolate the farmer from his family from the school, from the church, from the post office, from educational facilities, from all the social centers of thought and advancing civilization.

What can be done to show the farmer the necessity of good roads? Poor, bad, abominable roads are common. A piece of advice to the farmer: If the farmer might drive his teams would do more to convince him of the value and economy of good roads and to have him annually pay a tax on his property and his representative into the legislature demanding good roads in return for taxes assessed than any amount of pamphlets and pictures and speechmaking.

The New York Poor Roads.

The New York State is following

to an about federal aid for the improvement of the highways.

The federal congress has nothing whatsoever to do with the roads in the several states, and it is about time for Congress to get the secretary of agriculture money to make an inquiry which can do no good. A pamphlet compiled and printed by the secretary of agriculture on this question will be highly read and will serve no good purpose.

Every one who admires the

of course, in improving good roads in every state of the Union, and the funds available for that purpose should be judiciously expended upon the public highway system, and not upon the lands within state boundaries which have been reserved for its use, such as land occupied for lighthouses or government fortifications.
